- Plasma Applications Group
- Thin Films Group

North America CMP User Group

To explore the issues and challenges associated with Chemical Mechanical Polishing for the Planarization of Thin Films, and other associated applications.

C.A.M.P. International CMP Symposium

CAMP
Center for Advanced
Materials Processing

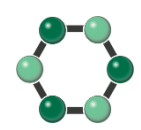

Clarkson University's Center for Advanced Materials Processing

The CAMP faculty work with New York State companies as well as national and international companies who are interested in understanding and utilizing state-of-the-art advanced, tailor-designed materials and processes to improve their products, solve manufacturing challenges, increase yield, lower costs, and/or establish new or novel products.

What is the C.A.M.P. International CMP Symposium?

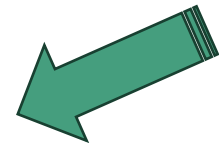

The purpose of this symposium is to provide a forum for the exchange of technical information and ideas related to the advancement of CMP and closely related technologies.

ICPT International Conference on Planarization Technologies

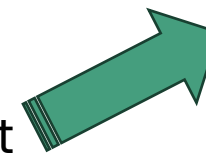

ICPT as an international symposium for Planarization/CMP offers magnificent opportunities for discussions on technologies including FEOL and BEOL CMP, 3D/TSV, Fundamentals of CMP, Polishing Processes, Consumables, Equipment, Green Devices, New Applications, Metrology, Cleaning, Defect Control, Process Control, CMP Alternatives, SiC, GaN, Sapphire and Diamond. The conference provides a place where researchers and engineers alike meet, discuss and share experiences in their field of knowledge.
